

Trail: Learning the Java Language

Lesson: Language Basics

The Java™ Tutorials

The Java Tutorials have been written for JDK 8. Examples and practices described in this page don't take advantage of improvements introduced in later releases and might use technology no longer available.
See [Dev.java](#) for updated tutorials taking advantage of the latest releases.
See [Java Language Changes](#) for a summary of updated language features in Java SE 9 and subsequent releases.
See [JDK Release Notes](#) for information about new features, enhancements, and removed or deprecated options for all JDK releases.

Java Language Keywords

Here is a list of keywords in the Java programming language. You cannot use any of the following as identifiers in your programs. The keywords `const` and `goto` are reserved, even though they are not currently used. `true`, `false`, and `null` might seem like keywords, but they are actually literals; you cannot use them as identifiers in your programs.
